CLINICAL DISCHARGE SUMMARY

Patient: Nusrat Jahan Sheikh
MRN: 884201
Attending Physician: Dr. Anika Sultana, MD (General Surgery)
Admission Date: 2026-08-12 | Discharge Date: 2026-08-15
Discharge Diagnosis: K35.80 - Unspecified acute appendicitis

Hospital Course: Presented to the emergency department with 18 hours of right lower quadrant pain, fever and leukocytosis. CT confirmed acute appendicitis without perforation. Underwent laparoscopic appendectomy the same day. Uneventful recovery; discharged on post-operative day 3.

Key Clinical Findings:
White cell count: 15,400/mcL on admission
CT finding: dilated appendix with periappendiceal fat stranding

Medical Necessity Statement (Attending Physician): Emergency surgery was medically necessary because untreated acute appendicitis carries a risk of perforation and sepsis.

Electronically signed: Dr. Anika Sultana, MD (General Surgery)
