Evergreen Regional Medical Center

ITEMIZED HOSPITAL STATEMENT

Statement No: STM-2026-1187
Patient Name: Farhan Kabir Sheikh
Date of Birth: 1998-11-09
National ID: 19987654321098
Passport No: A12345678
Phone: +880 1819-556677
Email: farhan.sheikh@example.com
Policy Number: POL-FAM-2026-00481
MRN: 902377
Admission Date: 2026-09-02
Discharge Date: 2026-09-08
Primary Diagnosis (ICD-10): A91 - Dengue hemorrhagic fever
Physician Medical-Necessity Note: ATTACHED

Date	Code	Description	Qty	Unit Price	Total
2026-09-02	ICU-DAY	Intensive care unit bed and nursing (per day)	6	450.00	2,700.00

CLINICAL DISCHARGE SUMMARY

Patient: Farhan Kabir Sheikh
MRN: 902377
Attending Physician: Dr. Imran Chowdhury, MD (Infectious Disease and Critical Care)
Admission Date: 2026-09-02 | Discharge Date: 2026-09-08
Discharge Diagnosis: A91 - Dengue hemorrhagic fever

Hospital Course: Presented on day 5 of fever with persistent vomiting, abdominal pain, mucosal bleeding and hypotension. NS1 antigen positive. Admitted directly to the intensive care unit for hemodynamic monitoring, fluid resuscitation and a platelet transfusion. Stable and transferred out of ICU on day 6; discharged after ICU observation.

Key Clinical Findings:
Platelet count: 18,000/mcL (nadir, hospital day 4)
Hematocrit rise: >20% above baseline (38% to 47%)
NS1 antigen: POSITIVE
Serum albumin: 2.9 g/dL

Medical Necessity Statement (Attending Physician): ICU admission was medically necessary: platelet count fell below 20,000/mcL with a hematocrit rise exceeding 20% and signs of plasma leakage, which carry a high risk of shock and hemorrhage without continuous monitoring.

Electronically signed: Dr. Imran Chowdhury, MD (Infectious Disease and Critical Care)
